Can you use shipping containers to build custom firefighter training structures?

Here's a few benefits in using shipping containers to build custom firefighter training structures. Using shipping containers for firefighter training is probably the most cost-efficient option there is. Used shipping containers are low-cost to purchase and can be modified in any way the fire department sees fit.

What types of fire training can a shipping container support?

Most shipping containers can support various types of fire training, such as digital, gas-fueled, or carbonaceous fires. This can allow fire departments to train in a variety of different ways or skill-levels using the same shipping container structure.

What is a firefighter storage container?

Portable storage containers are ideal structures for fire departments to conduct firefighter training. Shipping containers are highly versatile and customizable, allowing fire departments to stack storage units on top of one another to create any number of unique building designs.

Who can use containerized fire training structures?

Our containerized fire training structures can serve a wide range of industries requiring fire and safety training including airline, military, oil and gas, petrochemical, fire departments, and training academies.
