Does MTS Belarus have a 4G network?

MTS Belarus said its LTE-800 network covers 'thousands of settlements' across Belarus. Previously, it was launched in Vitebsk, Gomel, Mogilev and Minsk regions. In fiscal 2022, it plans to provide dense 4G coverage to the western regions of the country - e.g. the Brest and Grodno regions.

Is Belarus launching a 5G test zone?

TeleGeography's GlobalComms Database writes that in June last year, Belarus' national infrastructure operator Belarusian Cloud Technologies (beCloud) announced the ramping up of its 5G test zones in the country, as it entered the second stage of widespread testing ahead of the commercial launch of the technology.

When did A1 provide 4G connectivity in the Minsk Metro?

In April 2024, A1 provided 4G connectivity in the Minsk metro (at all existing stations and in the stretches between them). The project was implemented in partnership with the infrastructure operator beCloud.

Which mobile networks are operating in Belarus?

These mobile networks are operating in Belarus in 2G, 3G and 4G/LTE: MTS[???] (owned by Beltelecom & MTS Russia), A1 (formerly Velcom, owned by A1 Telekom Austria Group), Life: (mostly owned by Turkcell) for 4G/LTE: beCloud (partly state-owned, providing only 4G/LTE, for all providers above)

The path of A1 to the deployment of fifth-generation communications began in 2016 with the launch of the world's first fully virtual core of a mobile network. Further down the ...
