How does Amman get its electricity?

Amman currently sources the majority of its electricity from the national grid. As a result, stationary energy emissions, and specifically building electricity use, are the largest source of emissions for the city. In order to achieve diversify the source of its electricity and convert to largely renewable sources by 2050.

Can Amman build a solar PV plant?

In 2018, the national government signed a policy that allows all public institutions to build and own a solar PV plant up to 10 megawatts (MW). Amman would need to produce many times this amount, and it should focus on raising this ceiling. The Renewable Energy and Energy Efficiency Law (REEEL) No. 13 (2012) promotes renewable energy production.

Does the Greater Amman Municipality have a policy making power?

Thus, the Greater Amman Municipality government does not have the policy making, regulatory or fiscal power needed to lead implementation on all actions. Amman has a strong track record of collaborating with all levels of government, the international development community, and the private sector.

How to manage storm water in Amman?

a severe flash flood in Amman, leading to loss of life, damaged properties, flooded streets, and people trapped in their cars and homes. Thus, the effective management of storm water is one of the main priorities of the Resilience Strategy. Develop green infrastructure to capture and treat storm water in public spaces.
