As renewable energy continues to expand across the country, grid-scale energy storage systems are emerging as a critical foundation for balancing supply and demand, ...

Battery energy storage systems (BESS) equipped with grid-forming inverters have emerged as essential components for maintaining system stability in Australia's National ...

This pivotal project is set to enhance Australia's infrastructure by providing essential grid stability and supporting the integration of renewable energy, aligning with the ...

Discover the largest upcoming BESS projects in Australia, from the 2.4GW Denman Battery to the Waratah Super Battery.

Investment in large-scale battery storage is on the rise. The projects store up renewable energy generated during the day that can be used during peak periods. What's ...

We're working on a range of exciting projects geared towards supporting the energy transition. One example is the Wooreen Energy Storage System which will be built before the end of ...

Renewables developer Edify Energy has unveiled plans for a major 2.4 GWh solar and integrated battery energy storage facility in ...

Since then, investment in grid-scale battery energy storage in Australia's National Electricity Market - or NEM - has continued. 25 projects are now commercially operational in the NEM, ...
