---

Automatic fire protection systems either extinguish or prevent incipient fires in order to protect objects, rooms or entire buildings from fires and their consequences. The extinguishing agents ...

An advanced battery charging cabinet is often equipped with an integrated fire detection and extinguishing system, automatically ...

Batteryguard battery cabinets are actually solid fire-resistant safes, so you can be certain that any battery fire will never be able to escape. Our ...

Aerosol fire extinguisher work by removing heat: Aerosol systems release metal salt particles that surround the flame. On contact, the particles cool ...

The Perfluorohexane fire extinguisher is a device that automatically extinguishes fires in power distribution cabinets and energy storage battery packs. It consists of a 304 stainless steel ...

In the patented dual-wavelength detection chamber, the red and blue light scatter signals are accurately combined using precision algorithms to detect by-products of fire and lithium-ion ...

Batteryguard battery cabinets are actually solid fire-resistant safes, so you can be certain that any battery fire will never be able to escape. Our standard safes are already extensively equipped, ...

An advanced battery charging cabinet is often equipped with an integrated fire detection and extinguishing system, automatically activated when internal temperatures ...
