CHINA - Sidel has successfully completed grid integration of a rooftop solar photovoltaic system at its Beijing plant, marking a major milestone in its sustainability journey ...

Sidel's Beijing Plant's rooftop solar photovoltaic (PV) system has now achieved full grid connection. Thousands of PV panels now form a blue armour-like array across the facility, ...

With an installed capacity of 2.1 MW, Sidel Beijing's solar system is expected to generate 4,394,700 kWh annually - meeting 60% of the plant's daily operational electricity ...

Packaging supplier Sidel says its plant in Beijing, China, rooftop solar photovoltaic (PV) system has now achieved full grid connection. Thousands of PV panels now form a blue ...

Sidel's Beijing Plant's rooftop solar photovoltaic (PV) system has now achieved full grid connection. Thousands of PV panels now form a blue armor-like array across the facility, ...

Sidel's Beijing Plant's rooftop solar photovoltaic (PV) system has now achieved full grid connection. Thousands of PV panels now form a blue armor-like array across the facility, ...

Sidel's Beijing Plant has completed the grid connection of a large-scale rooftop solar photovoltaic (PV) system, advancing its commitment to sustainable manufacturing.

Since 2022, all Sidel plants globally operate on 100% renewable energy, with the Beijing solar project being a tangible manifestation of this commitment. Future plans include ...
