How much does a new power plant cost in Bhutan?

With construction now proceeding smoothly, the project is expected to be completed at a cost of Nu 4.3 billion and produce 260 MU of electricity per year. "These developments are more than energy assets; they're long-term economic investments," a senior DGPC official told Business Bhutan.

What is Bhutan's energy policy?

According to the National Energy Policy released in June 2025, Bhutan aims to expand its total installed capacity to 25 GW by 2040 -- 20 GW from hydropower and 5 GW from solar and wind. This strategy focuses on balancing export-oriented hydro projects with localised renewable generation to ensure year-round energy security.

What is the main energy source in Bhutan?

On-grid hydropower is the country's main energy source. Bhutan operates four major hydroelectric facilities, several small and mini hydroelectric generators, and has a handful of further sites in development. Many of the small and mini hydropower plants in Bhutan serve remote villages that remain disconnected from the power grid.

How many MW of electricity does Bhutan have?

Since then, both governments have successfully constructed and commissioned 336 MW Chukha HEP, 60 MW Kurichhu HEP, 1020 MW Tala HEP and 720 MW Mangdechhu HEP, enabling Bhutan to increase its electricity generation capacity to around 2,451 MW, of which 2,136 MW was developed under the four Inter-Governmental projects. 2.

Bhutan is set to strengthen its renewable energy portfolio with the upcoming commissioning of two key small hydropower projects -- Yungichhu and Burgangchhu -- by the ...

Adani Group and Bhutan's Druk Green Power Corporation (DGPC) have started development of the 570MW Wangchhu hydroelectric project in Bhutan, as reported by Indian ...

Adani Group begins work on the 570 MW Wangchhu Hydro Project in Bhutan; INR6,000 crore investment to boost regional renewable energy ties.

Upon completion, these projects are expected to contribute an additional 3,101 MW to the national grid, significantly enhancing Bhutan's ...

This has the potential to benefit both countries by enhancing energy security, strengthening their economies, generating employment, enhancing export earnings, and ...

Energy in Bhutan has been a primary focus of development in the kingdom under its Five-Year Plans. In cooperation with India, Bhutan has undertaken several hydroelectric projects whose ...

Designed to enhance energy security and provide drinking water to Thimphu and surrounding communities, the project exemplifies Bhutan's commitment to local participation, ...

Bhutan is entering a new era of clean energy with major commitments from Adani, Reliance, and Tata to develop large-scale hydro and solar projects across the kingdom.
