-----  
Who is Black Mountain Energy Storage?

Leveraging cumulative decades of electric market experience, Black Mountain Energy Storage develops powerful, flexible, and strategically placed battery energy storage projects to foster a resilient electric grid. BMES' quickly expanding team of energy experts are fast actors in pipeline development of utility-scale energy storage solutions.

Can Black Mountain Energy Storage build a battery energy storage facility?

Black Mountain Energy Storage is currently seeking to lease or purchase land to build battery energy storage facilities. A property needs to be at least 5-10 acres and located near or adjacent to existing electric transmission infrastructure in order to comfortably accommodate a battery energy storage facility.

What are the requirements for a battery energy storage facility?

A property needs to be at least 5-10 acres and located near or adjacent to existing electric transmission infrastructure in order to comfortably accommodate a battery energy storage facility. If you would like to participate, these are the steps you can expect:

Black Mountain Energy Storage aims to develop utility scale energy storage solutions uniquely positioned to provide key grid reliability services ...

How should regulators, utilities, and policymakers manage the range of challenges and opportunities that increased behind-the-meter energy storage deployment will bring to the ...

California's notorious solar overproduction - where midday power prices turn negative - gets solved by Black Mountain's "smart soaking" approach. Think of it as a giant ShamWow for ...

Black Mountain Energy Storage aims to develop utility scale energy storage solutions uniquely positioned to provide key grid reliability services required to support the integration of...

Black Mountain Energy Storage proposes to construct a utility-scale battery energy storage system (BESS) project in Kittitas County, Washington. The land is currently under a purchase ...

Black Mountain's plant will be a standalone facility, meaning it will not be tied to a specific wind or solar
