This article walks you through how to calculate your selling price, gives you a simple formula, and provides a calculator and infographic to make things super easy.

Use our simple break-even calculator to find out how much you need to sell to cover your costs. Knowing your break-even point helps you price better and plan for profit.

On this page, you can calculate selling price, cost price, profit percentage and net profit or loss for your sales transaction e.g., buying and selling of goods or trading in forex, stock markets.

Input your costs and desired margin, and let our calculator handle the rest!

Simply enter your fixed and variable costs, the selling price per unit and the number of units expected to be sold. Then, click the "Calculate" button to ...

As you enter or change values in the input fields, the calculator automatically recalculates the selling price, total cost, and profit. You don't need to click any additional buttons--results are ...

Enter the original cost and your required gross margin to calculate selling price, mark up and gross profit. This calculator is the same as our Mark Up Calculator.

Our break-even calculator is a useful tool to refer to when determining prices for the goods and services you offer, deciding on budgets or simply working on a business plan.
