---

The City of Cape Town will, in the third quarter of this year, release an RFP for 100MW of battery energy storage systems in an effort to bolster energy security.

Cape Town Mayor Geordin Hill-Lewis has announced that the City will design, build, and operate a R1,2 billion solar PV plant with battery storage capable of providing up to a full stage of load ...

A solar-plus-storage project is being planned for the capital of South Africa, as the city looks to move "away from Eskom reliance and towards a load-shedding-free Cape Town", ...

The City of Cape Town will invest R1.2 billion into a solar PV and battery storage project, which should produce 60MW of renewable energy - potentially shielding the city from one stage of ...

Our strategy is grounded in three key commitments: to end load-shedding, to alleviate energy poverty, and to optimise energy use across Cape Town.

Cape Town is set to become the first city in South Africa to own and operate its own solar plant. Construction is now underway on the city's own 7 MW facility, which will have ...

Joel Nana, a project manager with Sustainable Energy Africa, a Cape Town-based organization, called it "a bottom-up movement" to sidestep a generations-old problem.

The project is part of KenGen's Good to Great (G2G) 2034 strategic blueprint, which aims to roll out 500 MWh of energy storage capacity across Kenya over the next decade. [pdf]
