Can a grid-tied solar system power appliances during a power outage?

Grid-tied solar systems with batteries can power some essential appliances during an outage. Our grid-tied solar panel kits with battery backup included are ideal for maintaining critical appliances in areas with unreliable power. Reliable, low-maintenance backup systems for powering essential appliances during an outage.

Are off grid solar systems a good choice?

Over the past 6 years, dozens of overseas manufacturers have jumped on the off grid bandwagon. These systems are OK for occasional, light duty, non critical off grid applications but they tend to fail right when you need them most. At Off Grid Solar, we never include low cost, overseas knock off products in our systems.

Can I add battery backup to my solar system?

The federal Inflation Reduction Act of 2022 also contains incentives that may affect your decision to add battery backup to an existing solar system: Through 2032, you'll be able to claim 30% of the project cost as a tax credit when you file with the IRS.

How does solar power affect the grid?

Right now, there's so much rooftop solar and so many solar farms that they stress the grid during the middle of the day. All of the power they produce has to go somewhere, so it flows onto the grid, forcing the utilities to power down some of their big fossil-fuel plants, to keep electricity supply and demand in balance.
