Does China Export solar equipment to Africa?

Rodger Bosch/Agence France-Presse -- Getty Images China's solar exports to Africa are surging. Over the course of the past year, Chinese companies shipped out solar equipment to a vast range of countries on the continent, according to an analysis of Chinese export data by Ember, an energy tracking group.

What is China doing with solar panels?

It's part of China's global ascendance in the manufacture and sale of renewable energy technologies. Its companies make the vast majority of solar panels, along with the cells and wafers that go into them.

Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.

Why are Chinese solar panels so expensive?

The price of Chinese panels has fallen sharply because of overproduction of solar equipment inside China. Chinese firms desperately need new markets. African countries offer huge ones. More than 600 million people on the continent lack access to electricity.
