How will powerchina select a qualified supplier for energy storage system equipment?

According to the previously announced plan by PowerChina, this tender aims to select qualified suppliers for energy storage system equipment for 2025-2026. After the selection, a framework agreement will be signed.

What is the largest energy storage procurement in China's history?

The tender marks the largest energy storage procurement in China's history. In what is described as the largest energy storage procurement in China's history, Power Construction Corporation of China (PowerChina) is targeting an unprecedented cumulative storage capacity of 16 GWh. The bids were opened on December 4.

What is powerchina's storage initiative?

This storage initiative is part of PowerChina's broader equipment procurement plan announced on November 13, which also includes 51 GW of solar modules, 51 GW of inverters, 25 GW of wind turbines, and 15,240 prefabricated 35kV substations.

The large-scale centralized procurement aims to secure resources for PowerChina's renewable energy projects and align with China's green energy transition goals. ...

Opening bids for the largest centralised procurement tender in China's PV history have come in, with 51GW each of PV modules and ...

CNNC has published a tender notice for its annual PV-inverter procurement round. The bidding process for 2024 will be segmented into three ...

Low-price bidding for battery solar container energy storage system for solar container communication stations Overview How much does energy storage cost in China?

Opening bids for the largest centralised procurement tender in China's PV history have come in, with 51GW each of PV modules and inverters on the table.

Meanwhile, inverters (excluding converter boxes), monitoring systems, special tools, spare parts and technical services required for the ...
