China is adding more solar and wind power to its energy grid than any other economy - but that huge buildout has its challenges. Here's what we can learn

CHN Energy fully connected to the mainland grid a 1 GW solar power system that it built on the open sea off the coast of Shandong in China.

The world's largest 1 GW offshore solar farm located off the coast of Dongying, Shandong Province, China is now connected to the grid.

High on the Tibetan Plateau, a sea of photovoltaic panels is quietly rewriting what a power plant can be. China's biggest solar farm is not only feeding gigawatts into the grid, it is cooling ...

Electricity from solar has overtaken hydropower in China and is poised to surpass wind this year to become the country's largest source of clean energy.

China has more utility-scale solar than any other country. The 277 GW of utility-scale solar capacity installed in China in 2024 alone is more than twice as much as the 121 ...

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to harness the region's bright sunshine, cold ...

China is adding more solar and wind power to its energy grid than any other economy - but that huge buildout has its challenges. ...
