AFIR mandates that by 2030, 90% of all port calls by container and passenger ships at TEN-T ports must use shore-side ...

A detailed techno-economic analysis of the proposed HRES, incorporating two SEMS dispatch strategies, is presented based on the actual 10-year average port's energy ...

In this paper, we present the technical, energy market, and regulatory framework for transforming ports into energy hubs participating in short-term and long-term physical and ...

AFIR mandates that by 2030, 90% of all port calls by container and passenger ships at TEN-T ports must use shore-side electricity. However, accurately determining this ...

This study investigates the cost structure associated with transporting photovoltaic (PV) modules, comparing scenarios of international transport from China to Germany, a European ...

The Europe Modular Photovoltaic Container Market is experiencing significant growth driven by the increasing adoption of renewable energy solutions across the region.

In this article, we propose a methodology for optimizing size and energy management of seaport microgrids, including CI, to minimize costs and CO2 emissions. The ...

The price of solar PV modules has decreased significantly over the past decade, with the cost of solar power falling below grid parity in many parts of Europe, thereby increasing market ...
