How do electricity networks work in Australia?

Electricity networks transport power from generators to energy customers (infographic 1). Australia's electricity network infrastructure consists of transmission and distribution networks, as well as smaller stand-alone regional systems.

What is the electrical infrastructure database?

Abstract The Electrical Infrastructure database presents the spatial locations of Major Power Stations, Electricity Transmission Substations and Electricity Transmission Lines; in point and line format respectively, for known major power stations, transmission substations and transmission lines within Australia.

Which government branch provides electrical services in Canberra?

The Federal Capital Territory Branch of the Department of Home Affairs took on electrical services while the Department of Works and Railways took control of water and sewerage. In 1939, the branch providing electricity services became known as the Canberra Electricity Supply.

What is Australia's electricity network infrastructure?

Australia's electricity network infrastructure consists of transmission and distribution networks, as well as smaller stand-alone regional systems. This chapter covers the 21 electricity networks regulated by the Australian Energy Regulator (AER), which are located in all states and territories other than Western Australia.

The high voltage electricity network transport from generators to large demand customers and the lower voltage electricity distribution network. Listing provided by ...

On 1 July 1963, the ACT Electricity Authority (ACTEA) officially took control of the electricity distribution network in the ACT.

Two new 500kVA distribution substations were installed in Casey (March 2025) and Ngunnawal (June 2025). These substations have capacity to deliver more power and technology that ...

The ACT's current electricity distribution network is designed around a set of substations and feeders that serve energy to ACT suburbs via overhead lines or underground cables.

Our electricity network supplies 200,000 ACT customers and covers over 2,000 square kilometres. See our
