Could a new energy storage scheme help the UK achieve energy independence?

The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure. This could see the first significant long duration electricity storage (LDES) facilities in nearly 4 decades, helping to create back up renewable power and bolster the UK's energy security.

Could long duration electricity storage be the UK's first energy storage facility?

This could see the first significant long duration electricity storage (LDES) facilities in nearly 4 decades, helping to create back up renewable power and bolster the UK's energy security. These technologies work like giant batteries by storing renewable energy and releasing it onto the grid and into homes when needed.

What are the UK's largest energy storage projects?

Bramley BESS (Hampshire): 100MW /331MWh, currently the UK's largest energy storage project. Fidora Energy (Thorpe Marsh): A 1.4GW /3.1GWh BESS being built on a former coal site. Copenhagen Infrastructure Partners (CIP): Two 500MW /3GWh systems planned in Scotland.

What is the future of energy storage in the UK?

The UK's energy storage market continues to experience strong growth. In 2024, operational capacity of energy storage resources was 4.6 GW/5.9 GWh, which was projected to increase to 7.4 GW/11.6 GWh by the end of 2024. Moreover, the future looks promising, with total planned capacity for energy storage projects of 85 GW/175 GWh.

However, within the UK, numerous sites over 1GWh in size have already been approved and construction has begun on some of ...

This scheme will address longstanding issues that have delayed the development of energy storage infrastructure, particularly in ...

From mountainous pumped hydro to cutting-edge cryogenic and compressed air technologies, the UK is deploying a broad portfolio of energy storage solutions to ensure energy security, ...

The UK and the European Union (EU) are set to forge closer ties on energy trading and emerging technologies such as carbon capture ...
