-----

FFD POWER offers a modular deployment model for its 800V BESS platform, centered around an all-in-one, liquid-cooled cabinet with a typical configuration of 418 kWh ...

Intelligent power and sensing technology firm onsemi of Scottsdale, AZ, USA says that it is working with NVIDIA of Santa Clara, CA, USA to support the transition to 800V direct ...

To address the challenges of high power density and workload volatility, a dual-pronged approach is proposed, involving the ...

The RelyEZ containerized energy storage is fully scalable and integrates an inverter - so you don't need a transformer, reducing the construction footprint.

onsemi announced its working with NVIDIA to support the transition to 800 Volts Direct Current (VDC) power architectures, a transformative solution that is driving significant ...

Leveraging decades of innovation in both silicon and silicon carbide (SiC) technologies, onsemi provides industry-leading solutions for ...

PV inverters and the Power Conversion System (PCS) of the battery energy storage are connected to the main 800V bus through dedicated feeders. This design minimizes conversion ...

FFD POWER unveils its 800V Battery Energy Storage System, enhancing efficiency and scalability for PV-BESS projects with a modular, plug-and-play design.
