This greenhouse features a top covered with hollow solar panels and walls covered with hollow glass, combining the aesthetic appeal of glass greenhouses with the thermal insulation ...

**Durable and Long-Lasting Construction:** This solar greenhouse features a sturdy hot dip galvanized steel frame and tempered glass cover, ensuring a durable and long-lasting ...

Together with our partner Ammerlaan, we realise complete high-tech production facilities, from greenhouse construction to climate control and screening installations, including systems for ...

By integrating innovative rooftop solar glass panels, it generates its own electricity to power internal systems such as ventilation, irrigation, and climate control. This self-sufficient...

Together with our partner Ammerlaan, we realise complete high-tech production facilities, from greenhouse construction to climate control and ...

**Energy-Saving and Environmental Protection:** The solar agricultural greenhouse is designed to harness natural sunlight, reducing the need for artificial lighting and minimizing energy ...

The system achieved full coverage of the greenhouse roof through mechanized unfurling and furling of external thermal blankets, thereby achieving energy-saving insulation.

The multi-span greenhouse is characterized by its semicircular roof. It is a modular structure that can be adapted to different climates and crops due to its resistance to wind and crop loads.
