In 2025, the global energy storage market is projected to maintain its growth trajectory, with new installed capacity reaching 221.9 GWh, up 26.5% YoY, as InfoLink forecasts.

By application, grid-scale utility projects captured 64% of the energy storage market size in 2024, while EV-charging and transport solutions are expected to grow at a ...

Understanding the nuances of EPC projects, alongside other significant project categories like system integration, Energy Management Contracts (EMCs), and leasing ...

The U.S. energy storage industry has been observing remarkable growth due to increasing demand for efficient battery storage from different sectors such as EV, renewable energy and ...

DOE divides energy storage technologies into four categories based on duration of dispatch, each with different primary end uses. Adapted from Long Duration Energy Storage - Pathways to ...

By technology, batteries led with 82% of the United States energy storage market share in 2024, while hydrogen storage is projected to expand at a 28.5% CAGR through 2030.

Generally, energy storage targets can be broken down into two categories: (1) development-stage, pre-operational projects and (2) operational projects.

Energy storage is classified under the "energy sector", specifically in the realm of renewable energy technologies, electric utilities, and battery manufacturing.
