Unlike ICE fleets, there are many alternative solutions to keep your EVs charged and ready for action when disaster strikes. These solutions require significant planning and resources; it's ...

The 100kWh/90kW mobile energy storage EV charger delivers off-grid fast charging with LiFePO4 batteries, ensuring safe, stable, and reliable power for various emergency and on-site charging ...

Battery energy storage systems can enable EV fast charging build-out in areas with limited power grid capacity, reduce charging and utility costs through peak shaving, and boost energy ...

Bidirectional electric vehicles employed as mobile batteries can be mobilized to a site prior to planned outages or arrive shortly after an unexpected ...

Giving people better data about their energy use, plus some coaching, can help them substantially reduce their consumption and costs, according to a study by MIT ...

As MIT's first vice president for energy and climate, Evelyn Wang is working to broaden MIT's research portfolio, scale up existing innovations, seek new breakthroughs, and ...

In emergency scenarios, traditional charging infrastructure can be disrupted, leaving electric vehicles stranded without power. As an emergency charging solution, these mobile units help ...

At the MIT Energy Initiative's Annual Research Conference, speakers highlighted the need for collective action in a durable energy transition capable of withstanding obstacles.
