August 23, 2019: Equatorial Guinea is set to construct the first liquefied natural gas (LNG) storage and regasification plant in West Africa, advancing efforts to monetise gas resources through ...

A grid-scale energy storage system is composed of three main components: the energy storage medium itself (e.g. lithium-ion batteries), a power electronic interface that connects the storage ...

Unstable grids threaten solar manufacturing in Equatorial Guinea. Learn how a hybrid power system ensures operational stability, protects investment, and maximizes yield.

Discover how Equatorial Guinea's energy transition drives demand for advanced rechargeable battery systems. This guide explores market opportunities, technical innovations, and why ...

Summary: Equatorial Guinea has recently acquired a leading energy storage battery company, signaling its commitment to renewable energy integration. This article explores the implications ...

Antonio Oburu Ondo, Equatorial Guinea's recently appointed Minister of Mines and Hydrocarbons, has awarded independent exploration and production company, Panoro ...

Understanding how power systems operate in Equatorial Guinea is essential for stakeholders aiming to optimize energy delivery, improve infrastructure, or invest in the region. ...

Enter CRRC Energy Storage Malabo - the game-changer that's turning flickering bulbs into reliable power streams. As Equatorial Guinea pushes toward renewable energy adoption, ...
