What is a battery pack in medical devices?

The Battery Pack is a replaceable primary power source for the Compression Module in medical devices. It is suitable for devices like the DRAEGER ETHYLOMETRE 7410+ and uSmart; 3200T NexGen.

What can be customized in Li-ion batteries?

Li-ion batteries can be customized to meet unique specifications. Custom label, custom firmware and some performance options are available.

Why do ventilators need a backup battery pack?

Backup battery packs are critical within a ventilator design and mostly required to power the ventilator during power outages and the transfer of patients around the hospital.

Why should you use lithium-ion batteries for oxygen concentrators?

Our lithium-ion batteries for Oxygen Concentrators are engineered to support that mission, delivering long-lasting power and reliability and ensuring continuous operation even in changing environments.

Experienced end-to-end design and manufacturing services for medical equipment battery packs. World-class manufacturing facilities in Europe with stringent quality processes.

Find your medical device battery easily amongst the 148 products from the leading brands (PRIMEDIC, JINWO, SPORT-ELEC, ...) on MedicalExpo, the medical equipment specialist for ...

Primary lithium cells and battery packs are often used as it allows battery changes without needing to recharge cells. This is extremely important during the coronavirus (COVID-19) ...

Our recognised expertise guarantees that our custom battery packs comply with European and international regulations. We also incorporate the spirit of the ISO 60601 standard into our ...

While not all cell manufacturers will support Class III Medical Device applications, Epec Engineered Technologies has experience in designing and manufacturing battery packs that ...

Our medical battery packs ensure uninterrupted operation, stable energy output, and long cycle life, helping hospitals, clinics, and medical device integrators maintain continuous power in ...
