Do power tools need batteries?

The market share of power tools has been steadily growing in recent years, and with it regulations ensuring these appliances meet high safety and efficiency standards. While power tools regulations are on the rise, this highly innovative sector has also seen an increase in dependence on batteries to power the growing cordless tool segment.

How are battery tariffs reshaping global trade?

As new battery tariffs and expanded China tariffs continue to reshape global trade, U.S. policymakers and businesses are reevaluating the domestic battery supply chain. This section outlines the current status of U.S. battery production, the resources required to scale it, and the challenges involved in reducing reliance on overseas suppliers.

Can a batch of power tool products be marketed while stocks last?

Batches of products certified under previous Protocols before 1 January 2024 may continue to be marketed while stocks last. Again, power tool manufacturers need to be considering the batteries being supplied with their product ahead of the implementation of Protocol PE No. 1/40:2023 on 31 January 2025.

Are battery shipments included in China tariffs?

In consumer electronics, previously exempt battery shipments valued under \$800 are now included in the tariff structure following the policy change. This shift has affected U.S. handheld device batteries and backup battery unit importers.

2. Challenges in Importing Lithium Batteries Under China Tariffs
