---

2ES has developed a technical design for photovoltaic panels suitable for an optimal building integration, in particular via glass aesthetic canopies ...

Our industry-leading module power contributes to a conversion efficiency of 23.2%. Bifacial ratio reaches 80%,30% more module power generation than conventional modules. Two-sided ...

These two projects developed under the specific constraints of CRE4.1 and CRE4.2 tenders are the first projects in France using low CO2 bifacial dual-glass modules. ...

Compared to traditional glass-backsheet modules, they offer greater durability and environmental resistance. The dual-glass structure ...

Our industry-leading module power contributes to a conversion efficiency ...

The glass-glass modules are suitable for buildings with demanding architectural requirements, verandas & carports, photovoltaic fences as well as for areas subject to significant snowfall.

Compared to traditional glass-backsheet modules, they offer greater durability and environmental resistance. The dual-glass structure provides enhanced protection for solar ...

French solar PV products manufacturer RECOM Technologies has added a bifacial heterojunction (HJT) monocrystalline double glass module to its Lion Heterojunction ...
