Will Georgia Power keep base rates steady through 2028?

Georgia regulators have approved a plan to keep Georgia Power's base rates steady through 2028. The unanimous decision by the Public Service Commission on Tuesday follows an agreement between the utility and regulatory staff.

What is the average electricity rate in Georgia?

Residential rates in the U.S. range from 6 ¢/kWh to 71 ¢/kWh depending upon where you live, what types of power plants provide your electricity, and when during the day or year you're consuming electricity. The average residential electricity rate in Georgia is 15 ¢/kWh, which is 22% lower than the national average rate of 19 ¢/kWh.

What is a monthly electric bill in Georgia?

Monthly electric bills are a product of how much electricity you use per month and your electric rate. In Georgia, the average monthly electric bill for residential customers is \$252/month, which is calculated by multiplying the average monthly consumption by the average electric rate: 1,656.00 kWh * 15 ¢/kWh.

Can Georgia Power help lower energy costs?

Good news for Georgia families and businesses: Georgia Power has reached an agreement with the Public Interest Advocacy (PIA) Staff of the Georgia Public Service Commission (PSC) that, if approved, will help lower energy costs--all while meeting growing electricity demand across the state.
