Will a new solar glass plant in North Georgia create a strong supply chain?

"SOLARCYCLE's announcement of hundreds of jobs coming to a new, cutting-edge solar glass plant in North Georgia further cements the Peach State as a national leader in domestic solar manufacturing, and they will play a pivotal role in creating a robust supply chain for the United States emerging solar footprint.

Can solar glass make c-Si photovoltaics?

SOLARCYCLE's new facility in Georgia will position the company as one of the first manufacturers of specialized glass for crystalline-silicon (c-Si) photovoltaics in the U.S., with the capacity to make five to six gigawatts worth of solar glass every year.

Can recycled solar panels be used to make new solar glass?

The facility will be the first-of-its-kind in the country to use recycled materials from retired solar panels to make new solar glass. "SOLARCYCLE's first-of-its-kind facility is a transformational investment for the Polk County community and will help drive its economy for years to come," said Governor Brian Kemp.

The facility will be the first-of-its-kind in the country to use recycled materials from retired solar panels to make new solar glass.
