---

In 2020, Grenada produced 223 GWh of electricity, relying mainly on fossil fuels (98.12%), with a small contribution from solar energy (1.88%). In 2018, peak demand was 33.2 MW.

Installing a solar energy system on your home or building has never been easier. Call or email Power Shift and we will explain each step of the process and provide a free estimate for your ...

Supported by the Government of Grenada and the Grenada Electricity Services Ltd. (Grenlec), this transformative initiative aims to strengthen energy independence across ...

The review comprehensively examines hybrid renewable energy systems that combine solar and wind energy technologies, focusing on their current challenges, ...

Applying this method to an assumed PV/wind hybrid system to be installed at Corsica Island, the simulation results show that the optimal configuration, which meet the desired system ...

Supported by the Government of Grenada and the Grenada Electricity Services Ltd. (Grenlec), this transformative initiative aims to ...

Hybrid power systems are those that generate electricity from two or more sources, usually renewable, sharing a single connexion point. Although the addition of powers of hybrid ...

Grenada has substantial potential for renewable energy, particularly from solar, wind, and geothermal sources. Investing in renewable energy can reduce the island's dependence on ...
