Your VillaGrid energy storage system is configured through the inverter, where it can be set to maximize backup capacity, maximize energy savings (e.g., peak shaving), and many other options. Your VillaGrid energy storage system comes with a quick-start guide as well as a more in-depth manual to explain the available options.

Your system connects to an inverter which converts the DC energy stored in your VillaGrid battery storage system and converts it to usable AC energy that your home appliances can use. The VillaGrid allows you to avoid peak hour charges, reduces your dependence on the energy grid and keeps you running in the event of an outage.
