How many independent power producers are there in Pakistan?

There were around 36 independent power producers(IPP) that contribute significantly to the electricity generation in Pakistan. As of 2025, the Government of Pakistan is focusing to re-structure the agreements with IPPs and facilitate the end users. As of 2022, 95% of Pakistan's population had access to electricity.

Who owns the hydropower plants in Karachi?

The hydropower plants were retained by WAPDA as WAPDA Hydroelectric. All are fully owned by the government. K-Electric Limited (formally known as Karachi Electric Supply Company), which is responsible for power generation and distribution in the Karachi area, is listed on the stock exchanges and is privately owned.

What are the challenges facing Pakistan's power sector?

Pakistan's power sector continues to face significant challenges, with underutilization of generation capacity remaining a core issue despite recent renegotiations of independent power producers' (IPPs) power purchase agreements. In recent years, Pakistan has added more than 2,813 MW of capacity to the grid owing to domestic solar net metering.

Who owns the power in Karachi?

All are fully owned by the government. K-Electric Limited (formally known as Karachi Electric Supply Company), which is responsible for power generation and distribution in the Karachi area, is listed on the stock exchanges and is privately owned. Privately owned independent power producers generated 53% of the country's power in FY2016.
