What is a cellular base station?

A cell site, cell phone tower, cell base tower, or cellular base station is a cellular-enabled mobile device site where antennas and electronic communications equipment are placed (typically on a radio mast, tower, or other raised structure) to create a cell, or adjacent cells, in a cellular network.

How can I see the location of a mapped base station?

The map opens from left side main menu. In the maps tab you can see the location of already mapped base stations. The application will automatically only show the base stations of the current network being used (LTE in the picture). The location of base stations can also be viewed from the Cellmapper webmap.

How to find a base station?

Base station location in urban areas is best determined by doing round trips of city blocks. At more rural locations you should do larger sweeps to save time. You will get the best result on flat ground. Ensure that you have a sufficiently good connection to the base station as well as a GPS connection.

What are base stations & cell towers?

These structures facilitate the transmission and reception of signals between mobile devices and the wider network, enabling voice calls, text messages, and data services. Understanding the role and technology behind base stations and cell towers is key to appreciating how mobile networks operate and evolve to meet growing demands. Base Stations

Find location, program or service and contact information for U.S. Department of Defense's installations, military bases, and state and federal resources.
