Does Belgium pay for solar panels?

Each Belgian region (Flanders, Wallonia and Brussels) offers money to help pay for the installation of solar panels. The amount varies depending on where you live. Go to an online simulation to find out more. In Wallonia, for example, this aid can cover a large part of the installation costs.

How much does a solar panel cost?

In addition, you can receive a subsidy from the government for photovoltaic panels. The average solar panel price is around EUR1.26 per watt peak(Wp), although the exact price depends on a number of criteria: The accessibility of the roof (height, distance between the roof and the fuse box, etc.).

Can solar panels be installed in Brussels?

In Brussels, additional regulations are added: the solar panels can not be visible from a public space, and they do not protrude more than 30cm off the roof. For the installation of solar panels on the ground, on a protected building or in other regulated cases, you will have to contact your municipality.

Can you install solar panels on a roof in Belgium?

Installing solar panels on your roof is a (very) cost-effective operation. In Belgium, there are a number of subsidies to help cover the cost of installing solar panels. You can also choose the model of the self-consumption of energy produced by panels, which is also very advantageous.

The price of solar panels continues to fall. The price of the average installation has actually halved since the 2022 energy crisis, so it's a better time than ever to invest in solar ...

Solar power in Belgium reached an installed capacity of 9.9 GW at the end of 2023, an increase of 1.8 GW from 2022. Belgium had 4,254 MW of solar power generating 3,563 GWh of ele

OverviewTimelineNotable installationsSolar PV market by segmentFlandersSolar power in Belgium reached an installed capacity of 9.9 GW at the end of 2023, an increase of 1.8 GW from 2022. Belgium had 4,254 MW of solar power generating 3,563 GWh of electricity in 2018. In 2015 PV solar power accounted for around 4% of Belgium's total electricity demand, the 4th highest penetration figure in the world, although th...

Renewables--especially wind and solar--are rapidly increasing their share of Belgium's power supply. In 2023, wind and solar accounted for roughly one-third of the electricity mix, a ...
