How to get "GET" variables from request in JavaScript? Does jQuery or YUI! have this feature built-in?

11 request.GET is the dictionary of the GET variables in the http request made to your server for example:

However, if/when your data structure gets more complex, http GET and without JSON, your programming and ability to recognise the data gets very difficult. Therefore, unless ...

So, I've come up with a simpler script that returns all the GET parameters in a single object. You should call it just once, assign the result to a variable and then, at any point in the future, get ...

ajax jquery simple get request Asked 13 years, 10 months ago Modified 6 years, 4 months ago Viewed 264k times

The get/set pattern provides a structure that allows logic to be added during the setting ("set") or retrieval ("get") of a property instance of an instantiated class, which can be useful when some ...

From what I can gather, there are three categories: Never use GET and use POST Never use POST and use GET It doesn't matter which one you use. Am I correct in assuming ...

Here the get method finds a key entry for "e" and finds its value which is 1. We add this to the other 1 in characters.get(character, 0) + 1 and get 2 as result.
