Ensuring that the small community of Flúðir has its energy needs met sustainably is the mission of Flúðaorka Power Plant, the geothermal facility that we visited--and that you can explore ...

Existing hydropower in Iceland is used for both baseload and peaking power to provide almost all (aside from a small amount of pumped hydropower) grid electricity storage. ...

Meet the Qingxi Pumped Storage Power Station - the unsung hero making Iceland's 99.9% renewable energy grid possible. This hydraulic giant isn't just another power ...

The Nesjavellir Geothermal Power Station Iceland is a world leader in renewable energy. 100% of the electricity in Iceland's electricity grid is produced from renewable resources. [1] In terms of ...

Iceland is accelerating its sustainable energy transition by closing its last coal plant. Discover how this move impacts energy grid stability and its 2040 carbon neutral goal.

With major installations already in place and many more - both hydroelectric and otherwise - yet to be built, the Icelandic National Power Company has just announced its plans.

Nestled in the world's northernmost capital, the Reykjavik Energy Storage Project is rewriting the rules of sustainable energy. With Iceland already sourcing 85% of its energy from renewables ...

In this post, I want to explore how Iceland Carbon Capture and Storage actually works, why Iceland is the perfect place for it, and what lessons the rest of the world can take ...
