How many MW of gas-fired Teg are there in Ireland?

In December 2023, 193 MW of gas-fired TEG was connected to the system at North Wall, Dublin. This plant can be at full output within 15 minutes and can supply 3% of Ireland's peak demand. A further 224 MW of TEG is available to operate at our site in Shannonbridge, Co. Offaly, since August 2024.

What is temporary emergency generation (TEG)?

Temporary emergency generation (TEG) has been installed at the request of CRU by ESB and others at a number of sites as a short-term solution to enhance security of electricity supply. These generating plants will be connected to the system for a limited number of years until new, enduring power generation plants are connected in the late 2020s.

Are CPs generator containers controlled by DSE?

Our generators are coupled with Mecc Alte, Stamford, or Leroy Somer alternators and controlled via DSE or ComAp control panels to ensure top-notch performance. Why Choose CPS Generator Containers?

Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

Whatever your emergency power needs, DE Power Solutions are here to help. Whether it's stand-by, emergency back up or prime power that you need. Whether it's for an SME or a full data ...

Our 1000 kVA container diesel generator can assist with your planned or emergency power generation requirements. Whether on or offshore - our 1000 kVA generator hire service offers ...

Our containerised solutions are designed to provide optimal performance across various site conditions, ensuring excellent reliability for all your power generation needs.

In such cases, stationary container solutions provide a reliable and flexible option for power and emergency power generation. They are ideal for various applications, including data centers, ...
