I'm pretty happy with G15 (5800H + 3060) so far, but I really hate carrying ...

I had a g15 for a bit, and I charged with a 120w usb-c power supply when the laptop was off. It obviously didn't provide juice during actual laptop operations though haha.

Dell G15 5511: RTX 3060 130W i7 11800H 16GB RAM apparently the 180W shipped with it was not enough.

I'm thinking on getting an extra power adapter for my dell G15 5520, but the original adapter (240W) that comes with the notebook is terrible to be transported back and forth due ...

I'm pretty happy with G15 (5800H + 3060) so far, but I really hate carrying around the massive 230w power brick. I was thinking of getting a lower power adapter (65w or 130w) ...

Our products are manufactured to the industry's highest standards as the bottom line, making your computer safe to use. It also comes with a 6 feet total length power cord, ...

The Dell G15 5530 charger that it includes is 330W, but it seems too big and heavy for me. Most of the times that I transport it I don't use most of its capacities to wear out ...

No, you cannot. That laptop can only accept power through the barrel charging port and not the USB-C ports.
