What is a roof mounted solar attic fan?

Our roof mounted solar attic fan is our most popular residential model. It installs on most roof types including asphalt shingles, metal, shake and tile roofs and is fully operational right out of the box making installation quick and easy. The unit is available in 4 solar panel sizes: 32, 35, 48 or 65 watts.

What should I consider when buying a solar powered fan?

When buying a solar-powered fan, consider factors like fan size, noise level, portability, design, heating vents, price, installation, and the intended purpose. Proper care, such as safe storage, cleaning panels, and avoiding overuse, can ensure the longevity of your solar-powered fan. What is a Solar Powered Fan?

How do solar-powered fans work?

As we mentioned previously, solar-powered fans use solar panels to generate electricity. This electricity makes the motor of the fan function. The fan moves at the highest speed when the sun is at its hottest during the day. The solar panels in solar-powered fans are made of photovoltaic cells.

Do solar-powered fans wear out quickly?

So, if you are using your solar-powered fan for many hours, the motor or the solar panels might wear out very quickly. To prevent such a situation from arising, you should give a break to the fan now and then. That will help the fan conserve energy while remaining efficient.

Explore solar-powered fans for reliable, energy-efficient cooling. Find portable, rechargeable options with multiple speed settings and lighting features.
