Kiribati's dependence on imported oil to meet the majority of its energy needs creates vulnerability to oil price volatility and results in high energy costs, which place a burden on ...

As we approach Q4 2025, the project's second phase adds 2MW floating solar + hydrogen electrolyzers. Because when your entire country could disappear, you learn to store energy ...

Imagine a place where rising sea levels threaten daily life while diesel generators cough smoke into the same air people breathe. Welcome to South Tarawa, Kiribati - ground ...

Looking to address challenges at the local level, the roadmap recommends solar desalination in South Tarawa; a combination of wind power, PV and battery storage for Kiritimati Island; and ...

The All-in-One Energy Storage System by Huijue Group seamlessly integrates a solar inverter and a lithium battery, delivering an efficient and reliable new energy solution.

Specializing in island microgrid solutions since 2010, we've deployed 23 solar-storage projects across the Pacific. Our modular systems withstand harsh marine environments while ...

On September 6, 2022, Sino Soar Hybrid (Beijing) Technology Co., Ltd. received the bid award notification from the Kiribati Public Utilities Authority (PUB) and successfully won the bid for the ...

The Kiribati Energy Storage Project is flipping the script, combining solar arrays with massive battery banks to create a hybrid power system. Think of it as giving the islands a ...
