Will China's power sector reforms fuel a strong demand for lithium?

Sign up here. But China's power sector reforms helped to fuel stronger than expected demand for lithium used in batteries for power system storage in the second half of 2025, supporting a cautiously optimistic view of prospects for the new year.

What's going on with the lithium market in 2022?

The lithium market has been grappling with a supply glut since the second half of 2022, with demand failing to keep pace with surging supply fuelled by a furious price surge that year ignited by an electric vehicle battery boom. Make sense of the latest ESG trends affecting companies and governments with the Reuters Sustainable Switch newsletter.

Will energy storage be a game changer for lithium?

“Looking ahead, energy storage is likely to become a game changer for lithium, improving its fundamentals, but too high a price could undermine the economics of energy storage, keeping a lid on prices,” Su said.

A boom in battery storage has bolstered the demand outlook for lithium in 2026, driving hopes for an accelerated turnaround for an industry struggling with oversupply.

Pre-fabricated containerized solutions now account for approximately 35% of all new utility-scale storage deployments worldwide. North America leads with 40% market share, driven by ...

As Malawi's capital city grows, understanding the cost dynamics of power storage systems in Lilongwe becomes critical for energy planners and businesses. This guide explores pricing ...

The Lilongwe Mobile Energy Storage Power Supply Manufacturing Plant bridges the gap between renewable potential and reliable power access. By combining modular design with smart ...

This report provides an initial insight into various energy storage technologies, continuing with an in-depth techno-economic analysis of the most suitable technologies for Finnish conditions, ...

Lithium-Iron-Phosphate, or LiFePO₄ batteries are an altered lithium-ion chemistry, which offers the benefits
