Trina Storage, the BESS division of solar energy firm Trinasolar, has announced deployment of three new battery storage ...

Latent thermal energy storage (LTES) and leveraging phase change materials (PCMs) offer promise but face challenges due to low thermal conductivity. This work ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage ...

An international tender for the design, manufacture, installation, and technical maintenance services for Lithuania's battery energy storage system has been announced.

Trina Storage, the battery energy storage system (BESS) division of solar energy firm Trinasolar, has announced the deployment of three new battery storage projects in ...

Despite these developments, the system faces operational challenges. Low solar and wind generation combined with maintenance and interconnection constraints led to ...

The high-capacity energy storage system will be installed and serviced by a consortium of Siemens Energy and Fluence, which has designed, manufactured, and ...

In December 2021, Fluence and Litgrid, commissioned a 1 MW/1 MWh pilot project near Vilnius which serves as a proof-of-concept for the use of battery storage as a transmission asset.
