Sovereign Metals announced a bulk sampling program at its Kasiya deposit in Malawi to extract 100 tonnes of graphite ore. The bulk sampling aims to produce over 1,000 kg ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

In conclusion, the high-quality battery graphite found at Kasiya is a potential game-changer for both Malawi and the global battery industry. For Malawi, the project offers a ...

Australia's Sovereign Metals said on Tuesday that it had signed an agreement with the World Bank's International Finance Corporation (IFC) for the development of its Kasiya ...

NGX said electrochemical testing confirmed that coated purified spherical graphite from its Malingunde graphite project in Malawi met key criteria required for qualification in ...

Australian mining company Sovereign Metals has confirmed its Kasiya graphite concentrate in Malawi to be of "excellent" quality as ...

Australian mining company Sovereign Metals has confirmed its Kasiya graphite concentrate in Malawi to be of "excellent" quality as feedstock for lithium-ion battery production.

Kasiya represents a significant step for Africa in the battery and titanium markets, promising economic benefits for Malawi and a reliable supply for the global energy transition.
