PUEBLO, Colo. -- SunTrain, a San Francisco company, is designing a method to transport power by rail, moving containerized batteries between solar and wind farms in ...

Here we examine the potential to use the US rail system as a nationwide backup transmission grid over which containerized batteries, or rail-based mobile energy storage ...

SunTrain is developing freight trains equipped with lithium iron phosphate battery storage to transport renewable energy across existing rail networks. The development of ...

SunTrain is developing freight trains equipped with lithium ...

Now, there's a company looking to address that problem with a simple yet radical solution: Putting renewable energy into giant batteries and transporting those batteries by train.

By 2030, SNCF plans to install solar panels across 1.1 million square meters of railway station property. This ambitious project began ...

This research focuses on the Milan Cadorna-Saronno railway line, examining the feasibility of installing PV panels onto train rooftops to ...

SunTrain is planning a new mobile energy storage system that collects renewable energy where available, and ships it by rail where ...
