I try to opdate BIOS from CZCN27WW to GZCN37WW, I run update as administrator, update starts but fails,

I"ve tried the manual install. It did not work. Actually I tried 4 methods (not just the 3 listed above):

I"m trying to update my Iomega ix2-200 NAS(cloud edition) from firmware version 3.2.14.30167 and am specifically looking for version 3.3.2.24208, or any official intermediate firmware ...

Can anybody tell me what is in this "extension" package?

I have an M93p SFF Thinkcentre, which is restricted from updating to Windows 11 merely due to the version of TPM installed - tpm.msc tells me I have version 1.2.
