---

Masdar, a global clean energy leader, will lead the consortium developing the Ibri III Solar Independent Power Project, which combines a 500-megawatt (MW) photovoltaic (PV) ...

Designed for policymakers, renewable energy developers, and tech-savvy environmentalists, this megaproject could become the Middle East's blueprint for grid resilience.

You know, when you've got over 3,500 hours of annual sunshine beating down on Muscat's terracotta rooftops, it's kind of surprising that solar only accounts for 2% of Oman's energy mix. ...

The city isn't just building solar farms--it's rewriting the playbook for how desert nations can leverage energy storage to avoid becoming toast (literally) in a warming world.

The Muscat Airport expansion includes a modern terminal and a new runway that can handle the new Airbus A380, a 101-meter (331 ft.) control tower, 32 aerobridges, a new cargo terminal to ...

The large-scale project will include a battery energy storage system with 50 MW of solar and 14 MWh of battery energy storage capacity in Nusantara, the new capital city.

It is set to be the first energy storage project of its kind in the Middle East based on CO2 battery energy storage technology. A site has been identified for the establishment for ...

Muscat - Oman will soon announce its first renewable energy storage project as part of ongoing efforts to expand clean energy capacity and reduce dependence on ...
