-----

Development of 10nm-class process technology is currently going smoothly, and trial production using second-generation 10nm-class process technology (1Bnm) is expected to begin in 2022, ...

On the morning of September 20th, Sany Silicon Energy & Nanjiang 2GW Commencement Ceremony of High-efficiency Crystalline Silicon Photovoltaic Module Production Base Project ...

150,000 sqm facility with state-of-the-art automated production lines. Full range of customizable AC, DC Fast, and Solar-Powered charging stations. Personalized designs and end-to-end ...

Sichuan 2GW PV module production project put into production! The project constructs a production line of 2G W high-efficiency crystalline silicon photovoltaic modules, with a daily ...

Development of 10nm-class process technology is currently going smoothly, and trial production using second-generation 10nm-class process ...

This collaboration is set to begin in the third quarter of 2024 and SES will start to supply Nanya Technology and Formosa Advanced Technologies with green electricity.

This project isn't just about the solar module factory, but also includes the construction of off-grid power plants, mesh power systems and an interconnected grid. These ...

The project involves the construction of a 2GW high-efficiency crystalline silicon photovoltaic module production base on 6.6ha of land in Nanjiang County, Bazhong, Sichuan, China.
