What products contain rechargeable batteries?

Examples of products that often contain rechargeable batteries include: personal care devices, toys, digital cameras, cell phones, laptops, tablets, eReaders, wireless speakers and other devices, portable power tools and more. Consumers may find drop-off locations near them by visiting Call2Recycle, Interstate Batteries, or Harbor Freight.

What is a rechargeable battery plan?

Prior to selling rechargeable batteries in or into the state, manufacturers are required to submit a plan to the Department, that identifies the methods by which battery manufacturers will safely collect, transport, and recycle rechargeable batteries collected by retailers at the expense of the battery manufacturer. Plans may be submitted to:

Are battery containment methods a new concept?

While becoming increasingly more popular, battery containment methods are not a new concept. More than a decade ago, battery testing evaluated the heat and gas released from high energy dense lithium batteries intended to be transported on amphibious assault ships.

Are rechargeable batteries toxic?

Rechargeable batteries contain toxic metal that can be released into the environment when improperly disposed. The NYS Rechargeable Battery Law (Law), Article 27, Title 18 of the Environmental Conservation Law, was signed into law on December 10, 2010, and makes it illegal for any person to throw rechargeable batteries in the trash.

Recent pricing trends show 20ft containers (1-2MWh) starting at \$350,000 and 40ft containers (3-6MWh) from \$650,000, with volume discounts available for large orders.
