---

A new lead BESS, unveiled last week, now sits on Georgia Tech's Atlanta campus and will serve as an experimentation site for advanced research on medium-duration energy ...

The new energy storage lead carbon battery market is experiencing substantial growth, projected to reach several million units by 2033. This growth is fuelled by the increasing adoption of ...

The Consortium for Battery Innovation is the world's only global pre-competitive research organization funding research into lead batteries for energy storage, motive and ...

Governor Kathy Hochul today announced the launch of New York's first Bulk Energy Storage Request for Proposals (RFP), intended to procure one gigawatt (GW) of bulk ...

STATEN ISLAND, N.Y. -- Applications for 58 battery energy storage systems were approved by the NYC Department of Buildings in 2025 and another 98 are currently under ...

Among these, lead carbon batteries have emerged as a promising option for large-scale energy storage, especially in renewable integration and grid stabilization.

The Georgia Institute of Technology (Georgia Tech) and energy storage manufacturer Stryten Energy are giving new life to a more than 160-year-old technology: lead ...

Lead BESS was selected for this initial installation due to its cost-effectiveness, high discharge rates, and recyclability, backed by extensive research demonstrating its reliable ...
