---

The Nordic energy storage market is primarily driven by its leading role in tackling renewable energy challenges, particularly the fluctuations of wind and hydropower.

Wenergy has recently signed a new industrial and commercial energy storage project in Norway. The Stars Series liquid-cooled ESS cabinets will be deployed at critical nodes of the ...

In March, a 50 MW/100 MWh expansion project was announced for the Boden industrial park between Bodens Energi, Vattenfall and Polar Structure, thus breaking the ...

The Nordic region is at the forefront of the global energy transition, with grids increasingly powered by renewable sources. This creates a significant demand for large-scale energy ...

One of the primary objectives of the project was to create an energy-positive building by compensating for energy demands associated with material production, construction, ...

In March, a project at the Boden Industrial Park, between Bodens Energi, Vattenfall and Polar Structure, was announced, as a 50 MW / 100 MWh build-out, thereby claiming the ...

From advanced storage solutions to nuclear innovation, learn how technological breakthroughs are paving the way for a more flexible, efficient and sustainable energy future.

The initiative, led by Ingrid Capacity in collaboration with BW ESS, consists of 14 large-scale energy storage systems with a total capacity of 211 MW/211 MWh. This milestone ...
