A key example is the House of Choice Hotel in Solna, Stockholm, which was awarded for its ground breaking design that blends aesthetics with energy efficiency.

A key example is the House of Choice Hotel in Solna, Stockholm, which was awarded for its ground breaking design that blends ...

This makes the hotel the world's most photovoltaic-dense. Solar cells are often installed on top of roofs, with no regard for appearance. At the House of Choice, they add to ...

Our solar power plants are installed on the roofs and facades of hotels and provide clean and cheap electricity. The absence of any noise, vibration and harmful emissions during the ...

This article explores how advanced energy storage solutions and combiner box technologies address unique challenges in Nordic climates while improving system reliability.

The facade and roof of the building are clad with more than 2,400 square metres of solar cells, making the building one of the world's most photovoltaic-dense hotels.

This makes the hotel the world's most photovoltaic-dense. Solar cells are often installed on top of roofs, with no regard for appearance. At ...

This Northern Europe project implements a large-scale containerized energy storage solution to support utility-scale energy storage and grid stability.
