Do aggressive telecom industry wireless infrastructure deployment plans consider community interests?

Aggressive telecom industry wireless infrastructure deployment plans often fail to consider important community interests. This resource provides local elected officials and members of the public with examples of community protective legislative policies that have been adopted by municipalities across the United States.

Why did the Secret Service dismantle a telecommunications network in New York?

Please try again later. NEW YORK - The U.S. Secret Service dismantled a network of electronic devices located throughout the New York tristate area that were used to conduct multiple telecommunications-related threats directed towards senior U.S. government officials, which represented an imminent threat to the agency's protective operations.

Can a state prohibit the provision of telecommunications services?

t of deployment densification and enhanced capacity for covered services. Under sections 253 and 332(c)(7), state and local laws may not "prohibit or have the effect of prohibiting the provision of" telecommunications services or personal wireless services.166 At the core

Are telecommunication devices a threat to New York City?

The sophisticated telecommunication devices, found at five separate locations within miles of the city, were a potential threat, though officials stress there was no known active plot. No arrests have yet been made, but there is a search to find those who built the networks -- and why. NBC New York's Jonathan Dienst reports.
